To Whom It May Concern:

It is a distinct pleasure to recommend to you the team of Sunco Construction Company, Inc., General Contractor. They served as the Construction Manager of the \$5.9 million dollar expansion and renovation of the Mooresville Public Library. In my capacity as the Director of the Mooresville Public Library I worked closely with Doug McCoy, Project Manager, throughout the 16-month project. In addition, key contacts at Sunco Construction Company, Inc. were always prepared and willing to assist me if/as needed.

As the Construction Manager, Sunco Construction Company, Inc. assigned Doug McCoy Project Manager to the Library's project. As Project Manager, Doug managed our project including but not limited to; the bid process, the project schedule, coordinated contractors, planned and executed weekly construction meetings, and managed Affidavit of Payments (AIA) and secured Certificate of Completion. His work ethics were the direct result for our project being completed on time, few change orders, and under budget.

Let me state that I have no doubt the team at Sunco Construction Company, Inc., can adeptly meet the challenges of any construction project. The company is profoundly dedicated and responsible to the standards of the industry. Their proven ability and professionalism to manage a multifaceted project has been demonstrated via their vita; for the Library, it ranged from managing the remodel of our existing building, the construction of the new addition, and they continue to be available for consultation.

I would without any reservation recommend Sunco Construction Company, Inc., to you.

Sincerely,

Diane Huerkamp, MLS

Director

Mooresville Public Library
